Experience

YCSAS Pvt. Ltd
Internship

Yoga Scoring System is a web based software which can be implemented at any Yoga competition / championship.

- To leverage my experience gained through the internship at YSS Company, where I acquired practical skills in frontend and backend development, including HTML, CSS, Django, Bootstrap, and DBMS.

Projects

Student Management System
https://ourstudentmanagement.netlify.app/

- **Features:** Allows students to download available courses and enables administrators to upload and manage course content.
- **User Functions:** Provides a user-friendly interface for students to access and download course materials, while offering administrators efficient tools for course uploads and management.
- **Framework Used:** Spring Boot, React js.

Virtual Academy

- **Features:** Allows teachers to upload and manage notes by semester and department, assign and track assignments, and take attendance.
- **User Functions:** Enables students and teachers to create and update profiles, access educational materials, and receive OTP-based verification for enhanced security.
- **Framework Used:** Spring Boot.

Food Blogging Website

- **Features:** Allows users to access recipes for various food items and upload their own recipes. Includes OTP verification for secure user interactions.
- **User Functions:** Enables users to browse and view recipes, as well as contribute their own recipes to the platform.
- **Framework Used:** Node js.

Contact Manager

- **Features:** Allows users to upload, access, and manage their contact information.
- **User Functions:** Provides a secure and efficient way for users to store and retrieve their contact details.
- **Framework:** Nodejs.
